BERLIN, May 13.—While Adolf Hitler's armies swept on toward Brussels, Antwerp and Namur and stood at the gates of Rotterdam, the first move against the Maginot line was launched today with a terrific artillery salvo which allegedly drove French troops from their field positions.

Claim Liege Taken

Coincident with an official communique announcing German capture of the huge and strongly-fortified Citadel at Liege, military dispatches reaching Berlin told of German advances toward key-points along a 25-mile front between Saarbrucken and Zweibrucken.

Any successful break through the Maginot line in a southerly direction in that strech of territory would compel the French to abandon Strasbourg and wage a bitter battle

Battle On Largest Scale Since World War Is Now Raging

By ROBERT G. NIXON
International News Service Staff Correspondent

WITH THE BRITISH expeditionary forces in Belgium, (passed by field censor), May 13.—A desperate battle on the largest scale since the World War, upon which the fate of Belgium depends, raged today on the eastern frontier of Belgium.

British and French forces threw their full strength into an attempt to halt the mechanized German hordes pouring through a gap smashed in the courageous but unavailing Belgian resistance.

Hammered by the greatest artillery concentration since American troops began the final drive on the western front in the fall of 1918 and subjected to the incessant drumfire of bombardment from the air, the Belgian army fought steadily while withdrawing to prepared positions on a shorter front.

Britain Moves Against "Fifth Column Coup"

By CHARLES A. SMITH
International News Service Staff Correspondent

LONDON, May 13.—Destruction of 45 German planes in Belgium and Holland since Saturday and probable damage to or destruction of "as many more" was claimed by the British Air Ministry today as the government moved swiftly to forestall any possible "fifth column coup" on British soil.

A detailed communique describing British aerial action in the invaded low countries stated Royal Air Force planes successfully disrupted German troop movements and communication lines.

It admitted, however, that 35 British planes failed to return to their bases, bu that some of these made forced landing in France and Belgium.

Drastic Move

The sudden move against "fifth columnists" took the form of a drastice order for "temporary internment" of all male Germans and Austrians between the ages of 16 and 60 living in the eastern half of Great Britain, excluding the greater London area.

At the same time, the British press published increasing demands that police, world war veterans, air

building as I write, and anti-aircraft guns are roaring as the field-gray Nazis sweep on.

Belgium Not Lost

The picture is none too bright, but Belgium is not lost by any means.

The allied forces standing in the main path of the German advance by now probably have come to grips with a tremendous impact and the outcome is in the balance.

Belgian resistance gave way under the devastating effect of overwhelming land artillery and air power.

But for the fact that two vital bridges were not blown up, the German advance probably could have been checked longer. As it was, they mushroomed outward, making the Belgian flanks untenable as towns and villages in eastern Belgium were ground to dust by incessant air bombardments which took heavy casualties.

The roads leading into the active war area are jammed with refugees on one side and advancing motorized allied troops, artillery and tanks on the other.

I watched these today in the course of a 200-mile tour of the war zone which revealed sights pathetically reminiscent of those of 1914.

Many Refugees

Vacant-eyed women, children and old men were fleeing from the swift path of modern warfare. Some were aboard automobiles, some on pushbikes or in carts while others plodded afoot, with the ever-present menace of death above them as German bombers constantly wheeled and circled.

Always among their hastily gathered household possessions were the red blankets of Belgian peasants. I shall never again see that crimson color without my heart stopping a beat.

My first introduction to this war came at dawn today when German bombers glanced down from the skies. Plunging bombs shook me out of bed. As I watched, one bomber was driven to earth by a royal air force fighter.

I realized that my initiation in war was trivial compared to those fleeing women and children.

This war is something new in the world. The 1914 advance staggered civilization, but soldiers then traveled at four miles an hour on foot.

Travel At Terrific Speed

Today armies travel on motor-driven wheels and the speed staggers the imagination.

Where the Germans will be halted remains to be seen. It is no secret that the allied task is going to be the toughest job they ever faced. The power of this advance has the force of a West Indian hurricane.

German parachute troops are complicating the situation behind the lines.

War in the air as well as war on the ground is proving most costly to the royal air force, at last able to come to grips with the Nazi sky terror. But although the Germans are superior in number the R. A. F. is doing a fine job.

Wherever I went through the beautiful French and Belgian countryside, just blossoming into greenness, I saw the effects of air terror. Shattered houses and fire-gutted automobiles were thrown helter-skelter into heaps of rubble.

At one point where bombs had blown a farm-house and out-buildings to smithereens, only a few yards away in the shadow of new-leafed trees stood a picture of Jesus. It escaped unscathed by the devastating explosion.

ish, French and Belgian planes constantly attacked the German columns which pressed a flanking drive past Liege to Waremme, 13 miles northwest of the former city.

A wave of fresh confidence inspired all of Belgium today. Air raid alarms throughout the country and numerous bombings failed to dampen the Belgian conviction that Germany has no better than an even chance in the dark days that lie ahead.

Premier Hubert Pierlot, in a radio broadcast at 6 a. m., gave a resume of the military situation, claiming it was not nearly as dangerous as had been supposed.

Fifty Miles From Brussels

The Germans, it was indicated, are still fifty miles from Brussels.

Brussels and vicinity were attacked from the air again today, one heavy bomb dropping at Rixencert, 11 miles south of the capital. A French fighting plane pursued the German craft and shot it down at Altenberg.

Mid-way between Brussels and Ghent, German bombers mercilessly attacked the main road in an apparent attempt to break up allied troop movements. A large number of civilians were reported killed.

Fragementary advices indicated that French advance guards were in contact with the Germans.

Meanwhile, more than a quarter of a million allied troops already are in the battle lines or are en route to aid the invaded low countries.

Situation Vastly Different

The situation in Brussels was vastly different today from that prevailing yesterday, when depression over the outcome of the invasion reached a peak.

At that time United States Minister John Cudahy declared that he and members of his staff would remain in Brussels although some of the other foreign embassies and legations were preparing to depart.

Calm and Smiling, Cudahy said:

"We will stay on. What America did in 1914, we will do again."

Likewise, Foreign Minister Paul Spaak announced that the government will remain as Brussels.

The fighting in the Ardennes-Liege-Maastricht region was developing into one of the greatest and most furious battles in history.

German planes supporting the ground troops were spreading havoc all over the invaded lowlands but allied planes in increasing numbers, as well as British and French ground forces, were rushing to the rescue.

The new aerial aid brought fresh heart to the Belgian soldiers and public, all of whom felt that the British and French assistance had arrived in the nick of time.

More than 100 German planes were reported shot down over Belgium yesterday.

As the battle grew in ferocity and spread over constantly widening areas, thousands of civilians fled to the west of Brussels and cities beyond.

VICTORY IS ONLY AIM OF BRITISH SAYS CHURCHILL

(Continued From Page One)

against a monstrous tyranny never surpassed in the dark and lamentable catalogue of human crime.

"I have nothing to offer you but blood, toil, tears and sweat.

"Before us we have an ordeal of the most grievous kind and many, many long months of struggle and suffering.

"If you ask what is our aim, I can answer in one word—victory, victory at all costs, victory in spite of all terror, victory however long and hard the road may be.

"For without victory there is no survival.

"I take up my task in buoyancy and hope and feel sure that our cause will not be suffered to fall among men. . .

"I feel entitled at this time to claim the aid of all and say: 'Come then, let us go forward with our united strength.'"

Chuchill spoke for only seven minutes. His brief speech was a masterpiece of rhetoric.

BRITAIN MOVES AGAINST "FIFTH COLUMN COUP"

(Continued From Page One)

raid precaution workers and similar functionaries be armed to deal with a possible invasion of England by German parachute troops.

Belief was expressed that parachutists constitute one of the greatest menaces to the nation's security

Ready For Defense

The order interning enemy aliens and restricting the movements of non-enemy aliens created widespread satisfaction, but it felt that these measures were not sufficient.

On the other hand, it was pointed out by authorities that home defense officials have greatly strengthened their safety measures and that highly mobile military detachments, equipped with rifles, light machine guns and hand grenades have been posted at all strategic centers, ready to proceed anywhere that enemy landings might be reported.

Military police road patrols also have been established and are now halting all vehicles which appear suspicious. Guards at airports have been strengthened greatly.

The roundup of German and Austrian aliens, most of them refugees from the Nazi regime, proceeded rapidly with hundreds arrested by the time the home office order was made public.

GERMANS REPORT MOVE AGAINST MAGINOT LINE

(Continued From Page One)

for control of Alsace Lorraine in an attempt to hold that side of the Rhine.

Indications were that the Germans are attempting to push the spearhead of their Maginot attack through the forbach region where the French made gains at the very outset of hostilities last September.

New Mystery Weapon

Successful use of Germany's new mystery weapon—tentatively known as an "immobilizer"—against the fortresses of Liege undoubtedly encourage the long-waited move against France's fortifications.

This attack, it is held, will prevent the French from switching major units of their army from the Maginot line into Belgium.

A semi-official military comment said:

"The world must remember Reichsfuehrer Hitler's announcement of a new mystery weapon in a speech at Danzig.

"Its technical details are not known but it is believed to be of a more or less revolutionary nature."

General belief in Berlin was that the Belgians, as in 1914, will evacuate Brussels, Antwerp and Ghent and make their final stand next week behind the Escault river to hold Flanders.

Claim Sweeping Successes

Sweeping success in the German drive through Holland and Belgium was claimed today by the Nazi high command which officially announced capture of the Citadel of Liege.

This followed surrender of the Eden Emael fortress at Liege Saturday following a lightning attack with Germany's new mysterious weapon which presumably "immobilizes" enemy fortifications.

With advance German forces deep in Belgian territory, capture of the Liege Citadel clears the way for a major assault on Belgium's interior defense lines. While the Nazi objectives were shrouded in secrecy, it was assumed that a drive on Brussels was in the making.

The German and Allied armies are now at grips in mighty battle for the first time since the last war. While there was no hint as to the number of men actually engaged, reliable military information in Berlin spoke of "masses forces".

JACKSON-DAVIDSON WEDDING IN PARSONAGE

Another quiet but impressive wedding ceremony of Saturday was that which took place in the parsonage of the Central Presbyterian church, with the pastor, Rev. Robert Meade Patterson, officiating, with Martha Jackson of Lincoln avenue and James Davidson of Miller avenue as the principals.

The single ring service was read at 11:30 o'clock, in the presence of the immediate families, and the couple had as their only attendants Ruth Oliver of Beaver and Richard Tillia of Ellwood City, both cousins of the bride.

GIGANTIC WAR IN ALL ITS HORROR

THE Belgium and Holland page from "Mein Kampf" now being enacted in the European lowlands may indeed, as has been prophesied, develop into the greatest battle in history. As the war progresses the outcome of this campaign is still in doubt, but it is apparent that the Hitler hordes are receiving more than they expected. Parachute troops dropping to destroy vital air and communications centers, German soldiers in Dutch uniforms to spread confusion among the defenders, all the devastation and demoralization of the classic blitzkrieg are there.

Also the older Schlieffen plan is in operation-although making slow progress— the swing through Belgium that began the First World War, the invasion of France operating like a door swinging inward on hinges near Verdun. It was this gigantic wheel that in 1914 was to back the French armies into Switzerland. That goal failed with the first Battle of the Marne.

Holland's precautions were not the product of just another scare. This time, apparently, the Allied intelligence service was not asleep. This time Allied help for neutrals is much more timely and much more effective than in the past. The world shall soon see whether General Gamelin has a counterstroke in readiness or whether all the Allied resources must be thrown into the pit to avoid defeat, as they were at Verdun.

Hitler's successes in Norway, the admitted preponderance of his air force, may have emboldened him to make this tremendous stroke. For this is no attack on unorganized, improperly defended country as were the attacks on Norway and Poland. It is an attack on countries—at least in so far as France and Belgium are concerned—that are protected by every known means of fortification and defense. Nor is there any evidence of internal betrayal in either Holland or Belgium, as there was in Norway.

Shocking as is this violation of the territory of small neutrals, it is not surprising. After what already has happened in Czeckoslovakia, Poland, Denmark and Norway—not to mention Spain and Austria—no one could expect anything else from Hitler. It was just a question of time, resources and military strategy. All the other factors remain what they have been since Hitler launched his mad quest for domination.

Progress of the fighting in Holland and Belgium has increased confidence in the durability of Britain and France. It may reasonably be inferred, moreover, that resort to the blitzkrieg technique is, paradoxically, a sign of weakness as well as strength. Hitler and his aides must know that, over the long pull, the extensive resources of the British Commonwealth of Nations constitute an unconquerable bulwark of democratic prowess that will be more than a match for gangster nation methods.

A BLOW TO THE SILVER BUYING FOLLY

The senate's vote to end treasury purchases of foreign silver was significantly bi-partisan. Twenty-three Democrats joined with nineteen Republicans to stop one of the most foolish policies on which our government has ever embarked.

This country has absolutely no use for the quantities of silver it has bought from eager foreigners and will continue to buy unless the house backs up the senate's action.

Especially idiotic is paying fancy prices for silver which is promptly buried in the government's graveyard. The practical effect is to subsidize the foreign sellers. In the case of Mexico, if we are to accept the argument of those who defend the practice, we have been paying blackmail. For they say that unless we continue to buy her silver at inflated prices, more American properties may be seized without compensation.

As for the contention that we must pay huge bonuses to foreigners so that they can buy our goods, how does this sound to any hard-headed merchant? How long could he stay in business under such a system?

Subsidizing our Western mine-owners from the public till is bad enough. Squandering millions of dollars a month for foreign silver to stick in the ground is financial lunacy. The time to stop it is now. The senate has shown the way.—Philadelphia Inquirer.

THE FLEET IN HAWAII

Instead of returning to its California bases after extensive maneuvers in the Pacific, the United States battle fleet has been ordered to remain in Hawaiian waters for "further tactical exercises." this means that the fleet will be kept 2,000 miles from Uncle Sam's mainland shores at one of his island possessions.

If this possession is still an enormous distance from the Dutch East Indies, Japan is neither so dull nor so unsuspicious as not to draw her own conclusions. The sudden decision to leave the battle fleet at Hawaii came just before the nazi hordes invaded Holland.

The Far Eastern situation is in a state of flux. There are all sorts of curious developments. For example, Japan announces that on June 1 her government will take over operation of the Danish Great Northern Company's cables, ownership of which will pass into Japanese hands within three years. The Danes established their cable enterprise at Nagasaki in 1868, the year of the restoration of the Emperor Meiji. Four cables radiate from Nagasaki—two linking Japan with Shanghai and two with Vladivostok. The Danish cable network is an important one, and these Japanese links are an essential part of it.

At all events, after 74 years of Danish ownership and less than 30 days after Hitler's conquest of Denmark, Japan discovers that these foreign cables "present various troubles for Japan, where all communications are under unified control of the government."

Washington thinks that the United States battle fleet might just as well remain in Hawaii as return to San Diego. Perhaps the "further tactical exercise" in mind is just to leave the fleet out there in the Pacific, with Far Eastern observers free to draw their own conclusions. At least this will be the fleet's role as long as Japan keeps out of the Dutch East Indies.

The World AND THE *Mud Puddles*

THE FORM OF THE VERB

An American in London with the good, native, comic strip name of Tubbs has written a letter to the London Times about the form of the verb which should follow the name of this land. He wrote:

"May an American resident call attention to the improper use of the plural verb with the United States as subject? This practice finds its way into the otherwise impeccable leading articles of the Times to the regret of at least one of your admirers. The motto of the United States is 'E pluribus unum,' and Americans do not think of the name of their country in its literal meaning; they never say: 'The United States are.' When Americans wish to speak of their country in the literal meaning of its name they use the word 'States' without 'United.' This applies only to States regarded as individual units or to their relations one with another. When the country as a whole is meant, we use the complete name, United States, and always in the singular sense. This is in contrast with the English habit of referring to 'the States' when intended meaning is the American nation."

Mr. Tubbs is, of course, right. We fought a long and bloody civil war over that verb form and even in the midst of a war of their own our English neighbors would do well to remember that we are a united nation and not merely a collection of States.

Just Folks

By EDGAR A. GUEST

DOVES

They're just outside her window
That strange despondent two,
A pair of doves, most mournful,
And at dawn they start to coo.
Now she wakes to sounds of grieving
As if birds were known to weep!
And though night is hardly leaving
She is robbed of further sleep.

Mourning doves are fair to look at,
But whenever they are nigh
She would like to fling a book at
Him who makes that doleful cry.
And she says in tones emphatic
With a very solemn face,
I won't stand for such a racket,
You must drive them off the place.

I reply in phrases proper:
"I have never battled doves,
Shall I call a passing copper
Or use six-ounce boxing gloves?
If I tell them that our cedars
Are reserved for wren and jay
And less noisy feathered breeders,
Do you think they'll go away?"

Now I stand perplexed and puzzled,
By this garden problem deep,
Can a pair of doves be muzzled
For disturbing mother's sleep?
I can plead with them to drop it,
Drop that very doleful coo,
But if they refuse to stop it
There is nothing I can do.

DAILY DOZEN

(From the Medical Society of the State of Pennsylvania)

Little wonder shipwrecked sailors go mad from thirst.

The more sea water they drink, the thirstier they become.

Drinking is done to increase the fluid content of the body.

Less saliva is secreted when the body water is decreased.

This causes dryness in the mouth and throat.

Hence, the feeling of need for water—or thirst.

The body fruids contain about one per cent salt.

Sea water contains three times as much salt of various kinds.

When one drinks a fluid with a high salt content,

Salt extracts water from the tissues and blood stream.

Swallowing salt increases dryness of mouth and throat.

Fresh, cool water benefits the entire body.

The indifferent vote is the cause of a lot of trouble in this country Everybody should vote, no matter how little they know about voting. Many vote who should not be allowed to vote.

Allegedly coming from a letter written by a client to a county welfare office is this statement: "I am glad to say that my husband, who is reported missing, is dead."

We had two nice visitors in The News office on Saturday. They were Thomas and Michael Carvella. They were the first twin boys born in the Jameson Memorial hospital, Nov. 15, 1929. They got our first $10 for being the first twin boys born in the new hospital. They are sons of Mr. and Mrs. Mike Carvella, 212 Jefferson street. They are fine looking young chaps and we sure were glad to see them.

JOE

Joe always says: "Now cheer up Jim,
Just wait another day,
Your chances may look mighty slim,
But do just as I say.
The darkest hour, you know full well
Is just before the dawn.
A fellow's got to wait a spell,
So just you hang right on."
He'd always sound a note of cheer,
Look straight into my face.
Jim had that knack of chasing fear
From its dark hiding place.
If I were glum that fellow knew
An antidote for gloom,
You always seemed to sense it too
When he came in the room.
His was a light in darker times
That lit the place around,
He seemed to warm the chilly climes
Wherever they were found.
Such men are rare; what makes them so,
The few and far between,
Why are there not more men like Joe
Upon this mundane scene?
Then man who gloats so gladly o'er
His fellow "down and out,"
He makes himself a frequent bore
And joints right in the shout.
If he find out you struck it rich
Why, he's your friend for good;
But if he finds you in the ditch
He'll leave you in the mud.
This world is full of types like that,
So naturally I like Joe.
For friends like that I'll tip my hat,
Such men are FIT to know.

Good Taste

Reg. U. S. Patent Office

By FRANCINE MARKEL

"Today I overhead some women criticize me for an alleged 'tendency to overdress for most occasions.' Please advise me on this subject."

This question in this morning's mail I have answered thus: It is really in much worse taste to dress above than dress below any occasion. For shopping tours in town or any informal daytime affairs wear very simple tailored or sports clothes. Spiked-heeled shoes and fussy dresses look well at an afternoon tea or for informal dinner dates, but for visits to the shops, informal calls on suburban friends or any daytime country club activities they will subject you to criticism. The girl in the sketch printed above is properly dressed for the occasion. A prominent New York state politician when criticized for allowing his wife to wear her wealth of diamonds during morning shopping tours retorted: "Those who has 'em wears 'em." But so far as refinement and good taste are concerned those who thus "wears 'em lacks 'em."

Readers' Questions Answered

Dear Miss Markel: Who stand in the receiving line at a wedding ceremony and in what order?—Catherine.

Answer: If yours is to be a large wedding with a maid-of-honor and many bridesmaids, you may have two receiving lines—one for the bridal party and the other for your parents and those of your bridegroom. In this event, the parents' line forms near the living room door to be approached first by incoming guests. Your mother should head the line. Next to her should stand the bridegroom's mother with her husband by her side and your father last, if he wishes to stand in the line. If not, he may mingle with the guests. Farther back in the living or drawing room, in the most conspicuous spot, should be the bride's receiving line. In it are included the members of the bridal party, standing as follows: First, the bridegroom with his bride to his right and the maid-of-honor standing beside the bride. The bridesmaids may be either grouped beyond her or divided, half on the bride's side and half on the bridegroom's side. The best man and ushers usually do not stand in the receiving line. If you prefer, you may have only one receiving line, which may be formed as follows: Your mother first, with your father standing at her side. You come next with the bridegroom by your side, then his mother, his father, the maid-of-honor, etc. This method will allow the bridegroom to introduce the guests to his parents.

Church's Offer Not Taken Seriously
Haters Of Feuhrer Fear Consequences
What Prevents Hitler's Assassination

By CHARLES P. STEWART
Central Press Columnist

WASHINGTON, May 13.—Samuel Harden Church's recent offer of $1,000,000 for Adolf Hitler's delivery to the League of Nations, for trial as a criminal "against the peace and dignity of the world", has been taken with a certain amount of seriousness in some quarters.

Even in congress one hears the suggestion that maybe Samuel's proposal constituted a violation of our neutrality, and that perhaps its author laid himself open to prosecution by the justice department. Not that I think the department will act on this hint. Nevertheless, it goes to show how sensitive many folk are to anything that they deem the least bit likely to involve the United States in overseas hostilities.

If Sam had offered a reward for Adolf's actual bumping off, it's possible that he might have risked subjecting himself to federal punishment. He was careful to specify, however, that the Fuehrer must be delivered "alive, unwounded and unhurt".

The bulk of congressional comment is to the effect that he made a hopelessly low bid. The Allies, these critics point out, are blowing in billions to attain the same end that Sam offers only a measly million for. If billions can't turn the trick, they ask, who'll be tempted by Sam Church's cheap promised reward?

Looks Like Joke

My own notion is that Samuel himself simply was joking. Still, there are those who say that, if so, he was joking with a buzz-saw.

It's true, I've wondered why some anti-Nazi German hasn't taken a pot-shot or tossed a bomb at Herr Hitler ere now. There surely must be a few Germans who hate him. I wouldn't recommend his (or anybody's) assassination, but there are individuals who do believe in it in emergencies, and who practice it occasionally.

I have a family connection, long resident in a consular capacity, in Leipzig, but recently returned, in retirement; so he can talk.

I asked him, "Isn't there any anti-Hitlerism in Germany? If there is, how happens it that it includes nobody with the ginger to take a shot at the chap?"

"Yes," the ex-consul replied, "there's some anti-Hitlerism there.

"But, in the first place," he continued, "Adolf is mighty well guarded.

Just Suppose—

"And suppose that Hitler chanced to be riding, for instance, past a big apartment house, like this," said the ex-consul.

(We were passing one, in Washington, at the time.)

"And suppose," he continued, "a shot were fired at him from one of its windows. And suppose his guardians couldn't identify the window it was fired from. It wouldn't make any difference whether the shot hit him or not. Everybody in that apartment house would be killed immediately. Then a massacre of all Jews in Germany would follow.

"It's enough to make any well-meaning would-be assassin stop and think."

Subsequently, it will be recalled, there actually was an explosion at a Nazi gathering in Munich which was supposed to have been intended for Adolf's benefit, but he seems to have had an inkling that that gathering was an undesirable one for him to linger over. Anyway, he quit the building earlier than usual —and missed the explosion.

Popular Subscriptions

Sam Church didn't say he'd pay his whole anti-Hitler fund out of his own pocket.

He said he had subscriptions to it, to add to his personal contribution.

This popular subscription idea isn't altogether new.

The Chinese are taking one up now, to pay for the assassination of Wang Ching-Wei, Japan's puppet president of China, in opposition to the real president, Chiang Kai-Shek. Contributions as low as $1-Mex are thankfully accepted.

The Chinese are not as particular as is Samuel Church. They don't require delivery of Wang "alive, unwounded and unhurt". If he is so delivered he won't remain that way for very long.

The Fate Of Neutrality

Washington, May 13.

WITH the indecent and ruthless Nazi smash into Holland and Belgium, the utter folly and futility of being neutral in this war ought to be apparent to the remaining neutral nations in Europe. Obviously, to be neutral is to invite attack.

NO more evidence, it seems, should be needed. Witnessing the fate of Norway, Denmark, Holland and Belgium, it is impossible to escape the conviction that neutrality is no protection against the German aggressor. Neutrality simply means waiting your turn to be knocked off. The neutral nations have been—and are—neutral from sheer fear of the Nazis. They hope for an Allied victory because by no other result can their future integrity and independence possibly be assured. An Allied defeat means that the small neutrals of Europe will be dominated and dictated to by a conquering Germany; that national and individual freedom will disappear and neither their property, their lives nor their liberties be secure.

OF all this the neutral nations of Europe were aware long before the war started. They saw what happened to Austria and Czecho-Slovakia. Since the war began they have seen neutral, peace-loving nations which have kept out of war for hundreds of years — nations minding their own business and anxious to avoid friction—crushed, conquered, invaded, raped, and now living under the German heel, which well they know will never be removed from their necks until and unless the German power is broken.

THEY are—these neutral nations—caught between two of the great beligerents, one of whom respects their rights and the other disregards and tramples upon them, giving reasons so clearly false as to insult the intelligence. Again and again the armed invasion has come, without warning, but always followed by the lying claim that the German onslaught was forced to forestall similar action planned by the Allies or because the innocent neutral nation was not really neutral. Clearly, the neutrals have been pursuing a tragically mistaken policy. Clearly, their self-interest would have been infinitely better served had they immediately cast in their lots with the Allies, and early taken steps to avail themselves of the Allied strength, instead of supinely sitting on the fence until the German war machine ran over them.

AFTER the blow has fallen, then, it is true, they call for Allied aid, but then the Allies, respecters of neutral rights, are at a disadvantage. The enemy got there first and is in possession. Had Holland and Belgium early linked themselves with the Allies, they probably could have been saved from invasion and their beautiful cities from the destruction that now threatens. By these months of rigid and meticulous neutrailty they not only may have wrought their own destruction but damaged the Allied cause.

IT is no more worth while to stress the mistake of such neutrality now and point out that any other course would have been less disasrous than it is to dwell upon the alleged British incompetence or stupidity in Norway or the terrific difficulties of battling an already intrenched foe. The main point now is whether the rest of these neutral European nations, with the fate of nuetrality staring them straight in the face, will remain neutral, thereby contributing to a German victory and insuring their own despoliation, or whether the inescapable lesson of the last few weeks of the war will stimulate them to enlightened action.

THERE is also the question of what will be the effect of what has happened to these neutral nations—Denmark, Norway, Holland, Belgium—upon us, the great, fat neutral of the Western World. One effect may be to stir Congress to larger appropriations for national defense before this session ends and lend greater force to the words of General Pershing, Mr. B. M. Baruch, Secretary Edison and others who have been pointing out the feebleness of our army and questioning the effectiveness of our navy for a good many months.

AS for the effect upon popular sentiment, there are two views. One is that the desire to help the Allies in every way "short of war" will be enhanced; that it will induce us to cast aside our pretense of neutrality and make available for the side with which we so deeply sympathize everything we have—except an expeditionary force. The other view is that instead of increasing our desire to go in it will strengthen the determination to stay out. Secure in the belief that what has happened to the neutrals of Europe cannot happen to us, the hotter the war, the greater the reason for staying out. The chief reasons for feeling that the latter view is apt to prevail are that this is election year; that the two conventions come in June and July that the campaign will continue until November. No human being can tell what the situation will be then.

Pushing Plans For Trucker's Convention

Truck owners, drivers, and other members of the Pennsylvania Motor Truck Association take over Conneaut Lake on June 13-14-15, when the annual convention of the association will be held. Under the direction of Harry L. Gormley of New Castle, the general chairman of convention activities, a program has been in the course of preparation for the past several weeks and from it one gets the idea that the three-day period will be completely filled with events.

Listed as speakers for the convention sessions are a number of men who are nationally known. Among these are former governor of New Jersey, Harold Hoffman, National Grange Master Louis J. Taber, Chester H. Gray, director of the National Highway Users Conference; Ted V. Rodgers, president of the American Trucking Association, Public Utility Commissioner Richard J. Beamish and possibly Lieutenant Governor Samuel S. Lewis.

Should Attract Crowd

Because the convention is being held in western Pennsylvania this year it is likely that the western counties will be heavily represented by guests. Some of the strongest chapters of the P. M. T. A. are found in the counties west of the Allegheny Mountains and a friendly rivalry has sprung up to see which county will have the largest representation.

The convention is not all business. While there are many conferences planned in addition to the general sesisons of the convention, the entertainment field has been taken into consideration. Golf tournaments, dinners, and dances for the convention guests and their ladies, bridge teams, sight seeing tours, and other forms of entertainment.

The one feature that attracts the drivers each year is the Safe Driver contest, held to select the number one truck driver of Pennsylvania each year. This year's winner will be sent to Los Angeles in the fall to compete for the national crown. The present ittle holder in Pennsylvania is Chester Loper of Erie but the competition for his toga will be keen this year.

Truck Touring State

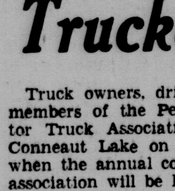

As a visual evidence of the keen interest taken in safe driving and as a reminder of the driver's contest to be held at the convention, the Accident Prevention Division of the P. M. T. A. has a truck touring Pennsylvania just now, with Chester Loper driving. This safety truck will visit every county in the state.

B&O Railroad Shops Is Interesting Place

A visit to the Baltimore and Ohio terminal at New Castle Junction reveals, among other things, the intricacies of high speed modern railroading. Perhaps no industry has advanced more than the railroads in the method of handling business and the equipment to handle it.

Starting at the roundhouse we see the new huge modern locomotives in the various stages of repair, some stripped down to where they no longer remotely resemble the snorting iron horse we are so accustomed to seeing speeding along the steel ribbons. Passenger locomotives of the most modern design are being serviced to haul the crack flyers of the road from New Castle west to Chicago and east to Washington, D. C.

Walking through the roundhouse a person cannot help feeling the atmosphere of responsibility created by the men doing their exacting jobs in a manner that will insure safety and comfort to the thousands of patrons who annually pass through New Castle Junction on the Baltimore and Ohio.

Requires Skill

The reconditioning of a locomotive requires the utmost skill of nine different crafts, from the first operation of stripping the jacket and lagging from the boiler shell through the various stages of laying out the shoes and wedges, setting the valve gear to perfect synchronization counterbalancing the driving wheels which must be in exact proportion to the weight carried on the crank pins, crank pins are renewed after a certain number of miles run regardless of the contion of the pins, the mileage record of each locomotive is kept for this renewal and for other shopping purposes. All springs and spring rigging is removed from the locomotive, spring rigging annealed and new bushings applied, the brake rigging which is air operated and controlled is overhauled to meet requireemnts of the Interstate Commerce Commission.

Tire renewals require the removing of the tires from the wheels centers and new tires are applied by heating and shrinking on the wheels. The interior of the boiler scaled and all flues in the larger locomotives over 300 in number and removed and new ones applied, new flue sheets applied and netting in the front end at the smoke box and spark arresters renewed.

New grates are applied in the fire box and a wall of heat resisting brick is built at the front end of the fire-box creating a greater efficiency of combustion and better circulation in the heating area. The cab is completely overhauled and back head of the boiler is stripped of lagging and jacket and new applied.

The various gauges, steam and air valves, stoker elevator and appurtenances removed and necessary repairs made. The tender of the locomotive is thoroughly gone over, the trucks torn down and reassembled, brakes adjusted coal space and water space repaired. After this has been done the engine is then ready for test and a hydrostatic test is applied, the test as applied is at 25 per cent more pressure than the normal working pressure of the boiler, the boiler shell itself being constructed to work at a pressure of 25 per cent of the highest safety factor. Various other appurtenances have been overhauled in the meantime, the injectors, speed recorders, automatic train control, mechanical lubricators, air compressors, generators, etc., in all thousands of parts large and small are used in the reconditioning of the locomotive.

The crafts represented in this work are the machinists, boilermakers, carmen, carpenters, bricklayers, pipefitters, electricians, painters and blacksmiths.

"FASTEST PLANE off the production line today!" That's how Homer Berry describes the Bell Airacobra, amazing new speed plane. He should know. This veteran speed test pilot started flying in 1913...started smoking Camels the same year. "No other cigarette ever gave me anything like the pleasure of a Camel," he says. "They burn slower, smoke milder and cooler. Camels don't irritate my throat and their full, rich flavor doesn't tire my taste. In 26 years, that slower burning has given me a lot of extra smoking." Before *you* take it for granted you're getting all the pleasure there is in a cigarette, try Camels. Enjoy the advantages of Camel's slower-burning costlier tobaccos. SMOKERS: SAVE THE COST OF THE STATE CIGARETTE TAX

Smokers who live in communities where certain state cigarette taxes are in effect can save the cost of the tax—and, in some instances, more—through smoking Camels. *(See panel at right.)* When you are a *Camel* smoker, you get this unique economy—and all the extra enjoyment of cooler, milder smoking—the fragrance and delicate taste of finer, more costly tobaccos.

Mercer Man And Young Bride Are Seriously Injured

Bridegroom Of Few Hours Dozes At Wheel, Auto Crashes Into Truck

(International News Service)

MEADVILLE, Pa., May 13—A bride and groom were in critical condition in the hospital here today, injured in an automobile crash Saturday just a few hours after their wedding. The victims were A. B. Richardson, 30, manager of the Mercer Sanitarium, Mercer, and the former Lucille Schreckengost, 22, of Erie.

Richardson told state police that he apparently dozed at the wheel, and his car crashed into the rear-end of a semi-trailer truck on Route 19, 11 miles south of here. Hospital attaches said both sustained probable fractures of the skull, fractures of the pelvis and fractures of the left leg.

Elks Cheer Mothers In Hospitals, Home

Lodge Remembers Them With Floral Bouquets On Mother's Day

Flower-bearing envoys of the New Castle Lodge of Elks, adhering to a never-forgotten Mother's Day tradition, left floral gifts Sunday with all mothers confined to the local hospitals and with those residing at the Almira home, East Washington street.

Exalted Ruler Wilbert J. Chapman and Edward J. Ryan, chairman for the floral distribution this year, toured the hospital and home rooms to extend personal greetings to the recipients.

Ryan said more mothers were visited this year than ever before. Forty-one were at the Almira hame, 40 at Jameson Memorial hospital and 33 at New Castle hospital. Each institution got an office basket, too.

The Elks' representatives were assisted by Mrs. Rose Sloan, superintendent, and Miss Mary Gillen, nurse, at Almira; by Sister M Clara, superintendent, Miss Eleanor Gibson, Mrs. Frances Ackerman and Patsy Tavalieri, at New Castle hospital, and by Miss Marian Losey and John Rand, at Jameson Memorial.

News Briefs From City Hall

Excepting for one automobile accident in which six persons were injured, although not seriously, police activities during the week-end were slow. Police made several arrests because of minor infractions of the law.

Patrolman Ray Showalter last night discovered a window shoved in at the Thompson gasoline station, South Mill street and discovered two young men fleeing down a railroad track. They escaped in darkness.

Authorities have been requested to search for Clyde Wright, colored, of 22 Harbor road, who reportedly has left home.

John W. Cartwright, elected city assessor recently, has tendered his resignation as the county's Second ward assessors to Lawrence county commissioners.

DUTCH ADMIT WITHDRAWALS BY SOME TROOPS

many wounded this morning during a bombardment of Amsterdam in which four heavy bombs landed in the center of the city, according to a French broadcast.)

"German troops at various points have crossed the River Maas (Meuse) and the River Yssel," the Dutch communique stated.

"Our frontier troops have partially withdrawn toward the interior."

(The Berlin radio claimed the Dutch defense line from Zwolle to Deventer, guarding the "gateway to western Holland," was broken at several points, and added that "northeast Holland is now in German hands.)

"Dutch planes bombed advancing German troops while French troops are in contact with the enemy east of Brabant," the Dutch communique contained.

Dutch Communique

"The northern provinces, which had no defenses, have been entered by the Germans with our frontier troops withdrawing while slowly up the German advance.

"German parties landed (presumably from planes via parachutes) during the first days of the invasion and seized motor busses containing Dutch civilians. Our armored cars have dealt with these.

"The Germans do not seem to be able to fight in the Netherlands unless they can use Dutch civilians as shields.

"Our artillery successfully attacked Waalhaven.

"Mopping-up activities in Rotterdam are nearly completed.

"The royal Dutch Marine (navy) is acting with the Allied navies.

"In the interior the Dutch military command has the situation fully under control."

Meanwhile, the Dutch tightened interior defenses against further "fifth column" activities with stringent regulations.

In the Hague a curfew was ordered between 10:30 p. m. and 7 a. m., and will be rigidly enforced. Further, it was announced, persons not possessing proper identification cards will run the risk of being summarily shot.

Round Up Fifth Columnists

The curfew extends to all the territory east from the frontier from Amsterdam to Zundert and includes the entire territory of the province of Brabant.

Many alleged fifth-columnists were rounded up in a thorough house-to-house search of Amsterdam.

In Rotterdam, 48 hours of fierce fighting had strangled the Nazi hold on the main part of the city as Dutch officials denied that Germany now controls half of Holland as claimed by Berlin.

The horde of Nazi parachutists which descended as a plague on Rotterdam and stabbed its way through the city's defenses to capture several important buildings has been shoved to the outskirts.

The Dutch in Rotterdam also have extinguished all the large fires set by falling shells and bombs. But there was an almost total lack of drinking water following destruction of the principal water works.

One victim of the fire was the Dutch luxury liner S. S. Statendam in the New-York-to-Europe service before the war. This morning, she was reported still smouldering at her Rotterdam dock.

Planes of the British royal air force aided Dutch troops in clearing the Hague of German troops, according to reports reaching Amsterdam.

The Dutch also thwarted another attempt to land Nazi parachutists in the Hague, it was reported here.

LARGEST SCALE BATTLE OF WAR IS IN PROGRESS

(Continued From Page One)

fought shoulder-to-shoulder with the Belgian defenders. The great Belgian forts at Liege and Namur are still holding out, the Allies said, although the German claimed capture of the Liege Citadel.

The Allies stabbed with counter-blow after counter-blow at Germany's air supremacy. German tanks and mechanized columns were reported thwarted in their forward thrust at Tongresand as a wave of fresh confidence swept all Belgium.

Situation Obscure

In London, authoritative quarters admitted the situation in Rotterdam, Amsterdam and The Hague—sorely beset by German parachutists—was still obscure. Other reports claimed successes for the Dutch defenders against the invaders from the sky.

Not since the American troops began the final drive on the Western Front in 1918 has any area of the world reverberated with such artillery concentration as poured shell after shell on the defending Belgians today. The artillery was backed by sweeping attacks by German bombers.

The battle was graphically reported by Robert G. Nixon, International News Staff Correspondent, with the British Expeditionary Force, who pounded out his story in a building rocked violently by the German bombs.

All raid alarms continued to scream incessantly in Central France throughout the night, and Paris was driven to shelter at 1:25 p. m. today as bombers roared overhead.

New Optimism

Nevertheless, a whole new spirit of optimism swept England with the reorganization of the cabinet under Winston Churchill.

In his first speech before the House of Commons—an historically short but memorably graphis address—Churchill invited the house "by resolution to declare its confidence in my government"

After he had warned of preparedness in the Mediterranean and succinctly outlined British military action, Hasting Lees-Smith announced on behalf of the Labor Party the decision of his group to support Churchill. The announcement was made to the accompaniment of tremendous cheers.

New Dutch withdrawals from the west of Gelderland were announced in Amsterdam.

TAYLOR-KELSO WEDDING IN PARSONAGE SATURDAY

Saturday afternoon at 4:45 o'clock in the parsonage of the Central Presbyterian church, Miss Elizabeth May Taylor, daughter of Mr. and Mrs. David J. Taylor, Sr., of 219 East street, became the bride of Howard E. Kelso, son of Mr. and Mrs. LeRoy Kelso, New Castle R. D. 2, in a quiet but impressive ceremony.

The single ring service was used with the pastor, the Rev. Robert M. Patterson, officiating in the presence of the immediate families of the young couple.

Given in marriage by David J. Taylor, Sr., the bride was lovely in an aqua crepe and chiffon dress, redingote in style, with accessories carried out in white. Her attire was complemented with a shoulder bouquet of yellow rose buds. Miss Bertha P. Taylor, as her maid of honor, wore a navy and white ensemble, with accompaniments to match. Her shoulder bouquet was of pink roses.

Frank Kelso served the groom as best man.

Supplementing the ceremony, a wedding dinner was served at the home of the bride's sister and brother-in-law, Mr. and Mrs. George Hudson, at Walmo. The all white theme was used in the table appointments, with the nuptial motif predominating. Places marked for only members of the families, numbering approximately 25.

FAITH

I wonder where the ambitions of the people in the world today are going to lead to?

The papers are full of reading matter. One paper or magazine tells you how to eat, work and rest, in order that you may have good health and live long. Also, is spending thousands of dollars teaching mothers how to take care of children so they will grow to be men and women.

While the other part is lying awake at night and putting in long hours, in order that they may develop some kind of machinery, gas or implements of war that they may kill off men, women and children.

We wonder which will succeed. Will those teaching people how to live be able to keep up with those who are trying to manufacture implements and teaching people how to kill? And, still we are all Christian nations, or supposed to be.

SUMMER CAMPS

This is the time of the year when many parents are thinking of sending their children away to camp for the Summer. I am reminded of this by letters from several mothers asking my opinion of the idea.

Well, I believe that a properly conducted summer camp can be an ideal place for a girl or boy for the summer, or for at least a part of it. I know some parents sneer at summer camps and suggest that those who send their children to them do so only to get them out of the way for a while. These persons do themselves no credit by indicating this belief.

Of course, it may be more convenient for parents to send Johnny and Mary to camps than to keep them at home or take them on family vacation trips, but I don't believe that is what motivates most parents in placing their youngsters at camps. Acting as parking places is certainly not the chief function of boys' or girls' camps.

Here around Callander we are in the heart of a summer resort country for both Canadians and Americans. Among our summer cottagers around us there are persons who send their children away from them to camps, and I know the mothers dislike very much to be parted from their youngsters and that they doubtless spend many uneasy moments of worry about them while they're separated.

But they understand and appreciate that a couple of seasons away from home at a summer camp can give a boy or girl great advantages very few of them could enjoy any other way. For instance, one of the most important things a boy learns in a camp is how to get along with other children. Often he is an only child, and has had few playmates. He has never had to really get along with them. Even if he has a brother or sister or two chances are he has never had to depend on himself the way he must when he is thrown with 50 or 100 others of his age group in a camp.

Usually when a child goes to a camp for the first time he is pretty lonely and miserable in the beginning. He wants to go home. He may think he is sick and send for his parents. He'll have all kinds of complaints to make to them about the camp. Usually all that's wrong, of course, is that he misses being babied If his parents let him stay at the camp, as they should, he will find others who are going through the same throes, and his feelings and theirs will draw them into companionship and friendship. Because he and they feel this need of companionship and friendship so much, they will learn to get along together, to share things and interests. They will get over their loneliness. And thereby they will have had one, but only an incidental, great benefit from the camp experience.

These new friends and the camp supervisors won't "baby" him as his parents and brothers and sisters do at home. He has to do things for himself. When he misplaces something, he must find it for himself. He finds too, that he must do his share in keeping the cabin or the tent neat and clean. He has these chores about the place he must share with four or five others, and if he shirks and doesn't do them, he will find himself in trouble pretty quick. I have known more than one youngster come home from camp with an entirely new and more healthy outlook on life. Being forced to do things for themselves made them conscious of their powers for the first time.

Learning to do things for themselves is made easier for the youngsters at camp than at home, because his supervisors are likely to deal with him in a more detached way than his parents do. Also, as one of 50 or a 100 of his age group, there is more encouragement to him to learn things that will make him want to excel and stand out as an individual. If a boy learns a fancy dive or fast swimming stroke while with his family, the feat isn't likely to get him much attention, but if he wins a diving contest or swimming race at camp, he gets cheers, a medal, prestige. And wise camp supervisors see to it that every boy in camp gets a chance to excel in something.

Of course, this blanket endorsement of the summer camp idea doesn't mean that parents should just send their children to any camp. They ought to select one carefully, being sure to look it over, and see the calibre of the leadership, if possible, before signing up Johnny or Mary. Some consideration should be paid to the child's desires and interests, too. If he's "crazy" about boats and the water, then a camp where there's sailing, fishing and such is the place for him. If, on the other hand, he likes climbing, the deep woods, trail-blazing, so to speak, then the mountain are probably best for him.

WE GUARANTEE the total amount figured by using this table to be the full amount you will pay, when payments are made on schedule. You will pay less if you pay your loan ahead of time since you pay charges only for the actual time you have the money. Payments include charges at Household's rate of 2½% per month on that part of a balance not exceeding $100, and 2% per month on that part of a balance in excess of $100. This rate is less than the maximum prescribed by the Small Loan Law.

B. E. HENDERSON, PRESIDENT

When you borrow at Household Finance, you pay charges only for the actual time you have the money. The sooner you repay, the less your loan costs. Four monthly installments of $26.58 each, or a total of only $106.32, for instance, will repay a $100 loan in full. (Payments shown in the table include all charges. You pay nothing more.)

One rate to everyone

Household charges only one rate —the same to everyone, whether new customer or former borrower.

All you do to borrow

All you do to get a Household Finance loan is to acquaint us with your problem. We require no salary or wage assignment, no stocks or bonds. (Loans are made on furniture, car or note.) No questions regarding your credit are asked of friends or relatives —and you don't have to ask friends or fellow-workers to sign the loan papers with you. You get the money you need in a simple, private transaction.

Fair treatment

Household shows every consideration to the borrower faced with sickness or unemployment while paying on a loan. Last year Household foreclosed on only one chattel mortgage for each 10,000 loans—an action taken then only as protection against fraud.

Find the loan *you* need in the first column of the table and read across. See how you can repay your loan with a small part of your pay check. Then phone or visit us. You will be under no obligation to borrow.

Stockholm Dispatch Says German Transport Is Sunk

Going From Oslo Towards Germany

Mined And Sunk In Sound Which Separates Sweden From Denmark

ANOTHER TRANSPORT REPORTED GROUNDED

(BULLETIN)
(International News Service)

LONDON, May 13.—A Reuters (British) dispatch from Stockholm said today that the German Transport Campania was mined and sunk in the sound, which separates Sweden from Denmark, while enroute to Germany from Oslo.

Another German transport, the Enhalt, was reported grounded in the same area but later refloated, according to the Malmo correspondent of the Newspaper Aftonbladet, Reuters said.

Claim Fake Attempted

The Dispatch added that a 25,000-ton German steamer was reported to have entered Swedish waters off Gothenburg, bearing a "makeshift Red Cross" on its funnels. This ship, said Reuters, was halted by a Swedish destroyer.

An earlier Reuters report from Stockholm said Sweden had mined its territorial waters off the southern part of Oeresund "to facilitate the task of preserving neutrality."

Report Sweden Blacked Out

The London Daily Express published an uncredited report that Sweden was blacked out because of the reported massing of German troops along the Swedish-Norwegian border.

(A dispatch from Berlin said authoritative German quarters discounted the Daily Express report in view of renewed neutrality assurances given to King Gustav of Sweden by Chancellor Hitler.)

Business Indexes Are Up In New Castle

(Special To The News)

NEW YORK, May 13.—How many families in New Castle did more than subsist or "break even" in 1939? How much was earned and spent in comparison with 1938? How does New Castle "stack up" against other cities?

These questions are answered in Sales Management's 11th annual survey of buying power, just completed after a year of research.

There were 6,209 families in New Castle, or 53 per cent of the total number, who had incomes beyond that required for the absolute necessities—food, clothing and shelter. In the entire country 51 per cent received more than enough on which to subsist.

New Castle, which has a trading-area population of 97,258, did a retail business last year of $19,182,000, an increase from the $17,060,000 done in 1938.

The effective buying income in the city, a figure that takes into account the cost of living, was $2,515 per family for the year, a rise from the $2,266 recorded the year before. The income for the average family in Pennsylvania was $2,478, and in the nation, $2,267.

New Castle's importance as a focal point for sales over a wide territory is shown by the fact that with .53 per cent of the effective buying income of the state, it accounts for .60 per cent of Pennsylvania's retail sales.

"White Collar" Projects On Display, May 20 To 25

New Castle and the Works Projects Administration will join the nation in a week's celebration, from May 20 to 25, to demonstrate to the community the value of the professional and service division of the W P. A.

With the Lawrence county commissioners the New Castle city council, the New Castle school board, the New Castle public library board and Colonel Philip Mathews, state administrator, directing the observance of "This Work Pays Your Community" week, every project will be open to the public for special periods, so that the public may visit and see the activities of W. P. A.

Plans Under Way

Preliminary meetings have been held, and plans for the week have been set in motion.

The purpose is to acquaint the people of the community, and the nation, with the accomplishments of the professional and service functions in terms of community value, and also to point out that much unfinished work in every community may be carried on through WPA cooperation.

Schedules of "open house" and the times the public may visit the projects will be made public prior to the opening date.

Officials and sponsors are eager to have the public visit their projects, and are inviting civic, patriotic, fraternal and social groups to visit one or all of the projects during the week. Lecturers will explain the functioning of each project.

Those who work on WPA are to be invited to visit other projects, and arrangements are being made to "stagger" the working hours so that those working on one project may visit the others.

Eleven Projects

New Castle has 11 projects, namely, education, recreation, sewing, housekeeping aide, library book binding, cotton clothing distribution, food distribution, historical records, Fennsylvania writers, music and arts projects.

Numerous original exhibits will be on display. There will be "dressing up" for the week, but the public will see the activities of the WPA projects as they actually function thrucut the year. Colonel Mathews, in describing the purpose of the week, said:

"In New Castle, the WPA has performed much useful and constructive work. With the cooperation of the local sponsors it has established education, recreation, production, service, records and arts projects that have served the community well. It is my hope that every citizen will visit one or more of these projects, so that he may see for himself the contribution our federal agency is making to this community. In a sense, this is our accounting to the public of our stewardship."

Committees in charge of "This Work Pays Your Community" week include: Miss Helen D. White, Mrs. Agnes Howley, Mrs. Margaret Fulkerson, Mrs. Olive Hilty, Miss Ruth George, Frank Leonard, Daniel Bailey, Ben Shulansky, Fred Alexander.

Milt Taylor And George Saunders Box Here Tonight

Light-Heavies Meet Second Time; Both Down In First Bout

BAXTER TO BATTLE DE PRIM IN 'PRELIM'

Having trained faithfully for two weeks, George Saunders of Youngstown and Milt Taylor of Cecil, light-heavies, are ready to clash in a three round battle tonight in The Arena. It will be their second meeting, Taylor having won the decision several weeks ago in this city.

In the opening chapter of their first setto, it appeared as though Saunders would stop Taylor because he had him on the floor for a count of nine. However, in the second stanza, Milt caught Saunders with a solid punch on the jaw and George went down for a count of five. The bell saved him.

They battled fiercely in the third round but Milt managed to out-sock the Ohioan and when the decision was given it went to Taylor. During the last round the fans were frenzied because of the heavy going. Fans demanded a rematch and tonight the 175-pounders will, no doubt, stage another thrilling fight.

It would be difficult for Tommy Leach, matchmaker of the Jefferson A. C. to arrange a more interesting calendar than that which will be presented fight bugs tonight. Some of the best amateur scrappers in western Pennsylvania and eastern Ohio are carded for action.

Seven Other Bouts

The bouts, in addition to the Taylor-Saunders fracas, follow:

Ed Manno, Pittsburgh (champion of McKeesport), vs Billy Murray, Cecil; 135.

Mike Candella, Youngstown G. G. champion, vs Benny Malone, Pittsburgh; 128. Return bout.

Regis O'Brien, McKeesport, who won the 147-pound Sun Tele title, vs Frankie Karik, Youngstown; 160.

Shed Bell, Youngstown, vs Muddy Kurtz, McKeesport; 160.

Wesley Rodgers, Grove City, vs Billy Reale, Castlewood; 155.

Russell Baxter, New Castle, Tony De Prim, Youngstown; 147.

Clinton Brown, Grove City, vs Al Dundee (Sun Tele champion, novice) Cecil; 116.

Local fans will pull for a victory for Billy Reale, swing-artist, over Wesley Rodgers of Grove City. Rodgers is bringing a big delegation from the college town to spur him on. They will also root for Clinton Brown who will meet the Sun Tele novice 116 pound champion Al Dundee. They are fast and no doubt will provide plenty of action.

Local eyes will focus on Russell Baxter, this city's latest seeker of pugilistic honor. Like Reale, he scored a kayo recently in Niles which came close on his last Arena victory. Tonight he will weigh 147 and take on Tony De Prim of Youngstown, who will be making his debut here.

Because of the crowds expected from Farrell, Youngstown, Beaver, Butler, Ellwood City and Butler the Jefferson A. C. will open The Arena doors at 7:30 p. m. The bouts, eight in all, will begin at 8:30 p. m. The fistic promotion has been authorized by the Amateur Athletic union and the State Athletic commission.

Giants Capture Fifth In Row

Take Firm Grip On Third Place, Reds Down Cardinals In Twin Bill

CHICAGO CUBS DEFEAT PITTSBURGH

By ED KIELY
International News Service Sports Writer

NEW YORK, May 13.—The experts all laughed when Col. Bill Terry said his 1940 New York Giants would figure in the National League pennant race, but today they watch with interest when his team begins to play.

Terry started the season with rookies filling in at three important positions—center field, second base and first base. He also had to convert a second baseman into a third sacker, and his "meal ticket," Carl Hubbell and Mell Ott, were reported on the downside of glory road.

Reds Win Two

Yesterday Terry's 1940 Giants won their fifth straight game by beating the Boston Bees, 3 to 2. To tighten their grip on third place.

Elsewhere the Cincinnati Reds copped a twin-bill from the St. Louis Cardinals, 7 to 1, and 13 to 4, to move another half game ahead of the Brooklyn Dodgers who downed the Philadelphia Phillies, 5 to 3, Pittsburgh was in the throes of another losing streak, dropping its second straight to the Chicago Cubs, 7 to 5.

In the American League the New York Yankees, behind the six-hit pitching of Red Ruffing, shut out the Boston Red Sox, 4 to 0, to end their longest losing streak in a decade. Cleveland, however, failed in a chance to gain on the sox when they dropped a 5 to 2 contest to the lowly St. Louis Browns. Ted Lyons pitched the Chicago White Sox to a 4 to 3 [illegible]ph over the Detroit Tigers and the Philadelphia Athletics beat Washington, 4 to 2, with Johnny Babich hanging up his fourth win of the year.

The newly illuminated field will be open to the public Thursday night. The grand opening will take place on that night, and the committee in charge has planned a good time for everyone attending. Free lunch and coffee can be had for the asking at the club house, of which "Jimmie" Cypher will have charge. Why not plan now to attend this new and novel sport? Shooting clay targets with 10,000 watts of artificial sunlight.

The meeting tomorrow night will be concluded with pictures furnished by the "Field and Stream" motion picture library. This meeting is open to anyone interested in our "great out of doors".

FROM ME TO YOU

By MESEEALL

The day wasn't as bright and cheery as it might have been, but there were plenty of smiles on the lips of many a mother as her dear ones remembered it was her day. Phone calls came aplenty, and candy and flowers carried many tender words of love . . . yes, it was a great day, but why not carry a little of yesterday's kindness forward and give a word or two to Mother the other days of the year? . . . life is short and you just get out of it what you put into it . . . if you want happiness, then you must give a little happiness.

* * *

Airplanes are becoming more and more popular around town . . . many a young man has his heart set on pinning a set of wings to his chest. Some day these boys might be the crack pilots of all times . . . who knows . . . but one thing they all must remember, a law exists that says you must fly at least 1,000 feet above populated areas . . . sometimes the boys sort of forget this law and venture a little low to show off to their friends . . . this is not a smart flyer. You can help promote flying if you obey all laws that go to make safer flying.

* * *

Just 18 days until you office folks get a one-day vacation. Yes, it's Memorial Day . . . maybe we shouldn't look at this day as a day to relax and get away from it all, but that is what a great many will do. However, down deep in the minds of the public the thought of the day will keep turning over. We folks here in the United States are proud of our country . . . a free and beautiful country, and we want to keep it that way.

* * *

Throughout the city and county we find fellows and a woman or two who have a hobby . . . a hobby where they work with wood, iron, plastics, paints, paper, cellophane or some other material . . . and they have become very skilled in these hobbies. Now comes their chance to show the world their work . . . to let the citizens judge their work, and if they are accepted by the public, maybe a prize will find their hands. This display will be on hand between May 21st and 25th . . . and this great idea is being sponsored by the New Castle Lions club . . . so in case you haven't entered this showing, do so now . . . entry blanks can be found at intervals in this newspaper, at industrial plants, W. P. A. projects, N. Y. A. office or the Greater New Castle Association.

Market Unsettled By War Situation

Market Cracks 1 To 5 Points At Opening Of New Week Today

By LESLIE GOULD
(International News Service Financial Writer)

NEW YORK, May 13.—The stock market cracked 1 to 5 points today in a renewal of liquidation by traders unnerved by latest bulletins from the war front.

Scores of leaders tumbled to new lows for the year, and selling was heavy enough to force the ticker 4 minutes late at one time. All sections slumped.

Chrysler again was a principal target, falling 5 points to a new 1940 bottom of 76½. General Motors, also at a new low, tumbled 2½.

American Airlines in a hard-pressed aviation section dropped 5 points, while Douglas lost almost 3.

Sears Roebuck was hammered down more than 3 points to a new low. Similar declines were suffered by Allied Chemical, Youngstown Sheet and Tube and Loft.

Losses of 2 or more points were sprinkled liberally throughout the list. These included Bethlehem, U. S. Steel, Westinghouse Electric, Johns-Mannville, Continental Can, Eastman Kodak and Celanese.

American Tobacco "B" retreated almost 3 to a new bottom. Other new lows were General Electric, North American Co., Consolidated Edison, U. S. Rubber, Goodyear, American Can, Western Union, International Nickel, N. Y. Central, Pennsylvania, Southern Pacific and Santa Fe.

CITY OPPOSES REPORTED PLAN

Council Protests Against Reported Plan To Divert Liquor License Funds

Council met in the city building Monday and adopted a resolution of protest against the state's reported plan to divert from this and other cities an allotment of moneys received from liquor licenses to relief. Should the money be diverted it will cost the city this year $20,000, already counted as anticipated receipts in the 1940 budget.

According to Councilman J. L. Fink, the finance director, that sum has been counted upon to pay some of the city's 1940 debts.

Mayor Charles B. Mayne said the $20,000 would be the city's share of $200,000 worth of city-WPA projects.

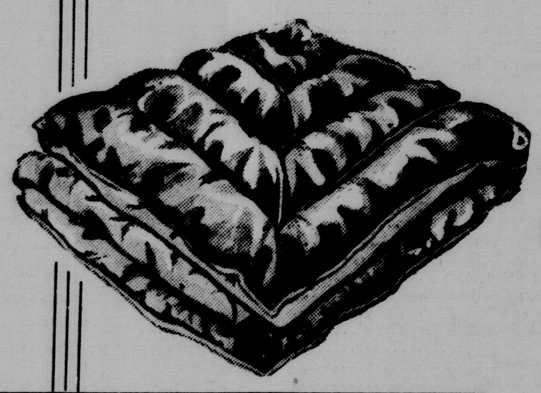

"If the money circulates 10 times, it means that approximately $2,000,000 will be lost here.

The state will pay in time the $20,000, without interest. "However," said the mayor, "the city may be required to borrow that sum

Federal Report Shows Electric Rates Low Here

By ARTHUR C. WIMER
Special Washington Correspondent
New Castle News

WASHINGTON, D. C., May 12.—The Federal Power Commission had another word of praise today for New Castle's residential electricity rates, reporting that on Jan. 1, this year, they were just about the lowest among all Pennsylvania cities of this population class.

The Commission bases its studies on typical net monthly bills. These bills are listed for 25 kilowatt-hours 100 kilowatt-hours, and 250 kilowatt hours. New Castle is grouped with cities from 10,000 to 50,000 population.

In no other city of this group does the home owner pay less for 25 kilowatt-hours and 250 kilowatt-hours than in New Castle. The cost of 100 kilowatt-hours is lower in 16 cities, but by only a few pennies.

On Jan. 1, the cost of 25 kilowatt-hours was $1.20 in New Castle. Ellwood City, Farrell and Sharon had similar costs. This was the lowest rate for this population group, Meadville, Warren, and Du Bois having the highest—$2.14.

For 100 kilowatt-hours the cost was $3.83 in New Castle. It was $3.75 in Butler, Arnold, Cannonsburg, Charleroi, Connellsville, Donora, Greensburg, Harrison, Jeanette, Latrobe, Monessen, New Kensington, Uniontown, Vandergrift and Washington, and $3.80 in Ellwood These were the only cities out of the 90 in this population group with lower rates than New Castle for 100 kilowatt-hours. Lewiston was highest with $6.23.

The cost of 250 kilowatt-hours was $6.45 in New Castle. Farrell and Sharon had similar rates, the lowest of the 90 cities. Butler came fourth of the 90 with a rate of $6.69 and Ellwood City 19th with a cost of $6.80. Harrison topped all others with a charge of $10.50.

Any smell of arnica in the clerk of courts office can be overlooked. The reason is the unprecedented rush for marriage license applications. All morning long Dorothy Gormley Smith and John A. Edgar stood, spelling each other off and taking in $2.50 from each couple. The day probably was the heaviest day in the history of the office.

Martha C. Shaffer files a suit against Patsy Padovano and Mary Padovano his wife, and John Lynch to recover on the face of a mortgage.
